BRILLE

EN Dear customer,

you are now holding: vacuum flask made from very durable plastic with an inner glass insert. The insert has heat insulating properties for keeping beverages hot or cold. Very elegant handle and practical cap. Easy maintenance and cleaning. 3-year warranty.

Operating instructions:

- 1.) The product is made from quality durable plastic. The internal insert of the vacuum flask is made from heat insulating glass designed for storing cold and warm beverages.
- 2.) Wash out the vacuum flask before every use with hot or cold water depending on the beverage that you will pour into the vacuum flask.
- 3.) Never fill the flask higher than the bottom edge of the pouring part of the vacuum flask, i.e. be at least 1-1.5 cm under the rim of the vacuum flask. Never pour boiling beverages into the vacuum flask. Do not drink directly from the vacuum flask.
- 4.) The temperature of the beverage in the vacuum flask depends on the beverage volume inside of it, how frequently it is opened and the ambient temperature. To maintain the temperature of the beverage in the vacuum flask for a long time, always properly close and tighten the cap. Keep the vacuum flask in a vertical position.
- 5.) Always pour out unconsumed beverages to prevent deposits from forming inside the flask and potential bacterial growth. Always be careful when handling hot water (the flask).
- 6.) Before first use, always wash the product and wipe dry. For regular maintenance, after some time, unscrew the base of the vacuum flask and clean out the area between the vacuum flask body and the glass vessel.
- 7.) To remove light stains, allow the flask to soak and then wipe it dry with a soft wiping cloth.
- 8.) Vacuum flasks are very easy to maintain and clean; when cleaning by hand use only soft wipes and sponges that will not scratch the surface. Do not use aggressive chemical products. Washing in a dishwasher is not possible.
- 9.) To maintain the long lifetime of the product, handle the vacuum flask with care – avoid strong impacts and shocks, if it does become damaged then do not use it anymore, always store it opened.
- 10.) ATTENTION: carbonated and sparkling beverages, ice cubes, dairy products do not belong in the flask. The vacuum flask is not to be used for baby food.
- 11.) Designed for domestic use
- 12.) The 3-year warranty does not cover: damage caused by the product falling or being impacted, technical modifications of the vacuum flask.

Safety notice:

High temperatures may damage the flask or the cap. The use of sharp metal utensils (e.g. knives, forks) may damage (scratch) the surface. The use of coarse or aggressive cleaning agents can damage the surface (e.g. caustic pipe cleaning agents). Negligent handling (e.g. of the cap) may lead to surface damage (chipping). **These „footprints“ do not have the slightest effect on the quality of the prepared food or beverages nor on the lifetime of the flask, they only affect its aesthetic appearance.** Through the effect of high temperature of the heat source, the surface may be damaged.

Ecology:

Depending on the size of the product, all products have marks printed on them denoting the material used for the production of the packaging, component and accessories, as well as their recycling. Correct disposal of this product helps save valuable natural resources and prevents damage to the environment caused by improper waste disposal. Ask your local authorities or collection facility for more details. In accordance with national regulations penalties may be imposed for the incorrect disposal of this type of waste. **Keep plastic bags out of the reach of children, danger of suffocation.**
